

World renowned Cancer Center in NYC, Is looking for the best and brightest in the country for their brand new facility. We are looking for a strong leader to oversee a very experienced staff of 20 FTE's in their Cellular Immunology/ Flow Cytometry department. Top pay and the benefit package is the best in the country. Salary range starts at 130k and goes up from there. Please contact Jeb Parichy at HealthCare Connections to be considered for the position. Onsite interviews are being set up immediately with the Administrative Director.

Cellular Immunology Laboratory Manager

The Cellular Immunology Laboratory performs a series of assays on various cellular components of the immune system. The assays consist of lymphocyte proliferation by mitogens and antigens, natural killer cell activity, immunophenotyping of lymphocytes, monocytes, granulocytes, bone marrow, peripheral blood progenitor/stem cells, cord blood and leukapheresis products. These studies are relevant in the diagnosis of immunodeficiency disorders and in monitoring the effect of therapy on several groups of patients, including those receiving bone marrow transplants or biologic response modifiers.

It's a very exciting time for our Laboratory Medicine department as we recently moved to a new state-of-the-art laboratory medicine

We are seeking a new Manager for our Cellular Immunology Laboratory. Testing conducted in this laboratory includes lymphocyte proliferation assay, natural killer cell assay, and flow cytometric immunophenotyping.

You will:

- Manage a team of approximately 20 staff, including taking responsibility for recruitment, performance appraisals and education of the team.
- Work closely with the supervisor to assure adequate staffing and educational opportunities for the team.
- Be responsible for preparing and managing the lab budget, covering equipment, supplies and staffing.
- Collaborate with other departmental managers to create and implement department-wide initiatives.
- Review validations and SOPs.
- Act as the escalation point for the team when difficult samples require review.
- Ensure the lab remains compliant with safety standards, legal regulations, licensing and accreditation requirements.

You are:

- A strong, assertive leader who is able to motivate and inspire a high performing team.
- Someone who excels at managing multiple projects within dynamic, changing settings.
- Highly skilled in flow cytometry.

You have:

- Bachelor's degree required (Biology, Medical Technology or Clinical Laboratory Sciences preferred); Master's degree preferred.
- 10+ years managing or supervising in a clinical lab setting.
- 2+ years' experience in flow cytometry.
- A current NY State License preferred but not a must
- Strong experience in formulating and managing budgets.
