AMLI and ASCP Collaborative Clinical Immunology Webinar

Date: October 3, 2021

TIME: 10AM EST

TITLE

Adoptive T cell therapies “Clinical Applications from Cancer to COVID-19”

Catherine Bollard, M.D., M.B.Ch. B

Professor of Pediatrics
Children’s National Medical Center,
Washington, DC
Director, Center for Cancer and
Immunology
Director, Program for Cell Enhancement
and Technologies for Immunotherapy
(CETI)

Michael Keller, M.D.

Associate Professor
Children’s National Medical Center,
Washington, DC
Director of the Translational Research
Laboratory in the Program for (CETI)
Director of the Jeffrey Modell Research
and Diagnostic Center for Primary
Immunodeficiency Disorders.

Session Description: This session will provide a lecture on the clinical applications and diagnostic relevance of adoptive cellular therapies, specifically focusing on T cell therapies for the treatment of infectious diseases including SARS-CoV-2. There will be a 45 min lecture (pre-recorded) by a leader in the field followed by 15 mins of live Q&A.

Practice Gaps addressed: This session will focus on the applications of Virus-specific T cell therapies (VST) and discuss the role of diagnostic evaluation to follow patients treated with these therapies.

3 Outcomes:

1. Gain knowledge of the development and applications of T cell immunotherapy.
2. Understand the principles of diagnostic monitoring of adoptive cellular therapies
3. Describe the negative consequences of such therapies, and strategies to mitigate them
