

LETTER FROM OUR PRESIDENT

AMLI Community –

Happy New Year!

We've formed the Scientific Affairs Committee! The group is hard at work developing webinars, and suggestions for future webinars are always welcome! If there are particular topics you feel should be addressed by the Council or presented at our Annual Meeting, please let Maggie Fogel or myself know.

We are actively updating the [AMLI Committees](#) and individuals interested in serving on an AMLI Committee should voice their interest. I strongly encourage our members to pursue these Committee opportunities. They are a great way to be involved and network with other professionals. Specifically, our new members can benefit from this exposure.

I hope that everyone has seen the tremendous efforts by Drs. Sara Nandiwada and Kevin Goudy in establishing the AMLI Listserv! Please use this new tool for your professional comments/concerns/questions. The more people are using it, the more we all benefit from this further engagement in the AMLI Community. I think the Listserv is an excellent new tool for our Society to stay engaged and advance the field.

Stay tuned for a poll I'll be posting soon about laboratory practices to which I hope everyone will respond!

Sincerely,

A handwritten signature in black ink, appearing to read 'Eric T. Weimer', written in a cursive style.
